The Skillians Private Limited

MERN Stack Web Development

2024 – present

About Me

A highly organized and hard-working individual is seeking a responsible position to gain practical experience. I am eager to kickstart my career as a Full Stack Developer. Possessing a solid foundation in web development technologies such as HTML, CSS, and JavaScript, and proficiency in front-end frameworks like React and back-end frameworks like Node.js, I am well-equipped to contribute to dynamic and innovative projects. I am enthusiastic about continuous learning and adapting to emerging technologies in the rapidly evolving tech landscape. With a passion for creating efficient and user-friendly applications, I am eager to contribute my skills and dedication to a dynamic development team.

Professional Experience

aarvee associates of architects engineers | civil engineer

2021 – 2023

- We proactively tackled real-time challenges, developing innovative solutions that have the potential to drive significant national transformation shortly.
- Led groundbreaking projects with the potential to drive national transformation in the coming years.

Projects (GitHub Link)

Reliance Digital (Project Link) (Hosted) – HTML, CSS, and JavaScript.

- Developed a fully responsive Reliance Digital Clone, enabling users to purchase trending and authentic Reliance electronics with exclusive offers.
- complete with a seamless user interface and core functionalities, including account management and a robust e-commerce experience.
- This version highlights the key aspects of the project while emphasizing the quality and user experience.

Boat Clone (Project Link) (Hosted) – HTML, CSS, and JavaScript.

- Designed and developed a responsive e-commerce website for Boat products, showcasing trending electronics with advanced search, cart, and payment functionalities.
- The platform offers a streamlined user interface, secure login/logout, and a seamless shopping experience from product discovery to purchase.
- This phrasing highlights the project's scope, technical features, and the value it provides to users..

Mamaearth Clone (Project Link) (Hoisted) – MERN Stack

- Developed a web application for Mamaearth, showcasing a diverse range of all-natural beauty products tailored for every skin type, with intuitive search functionality that allows users to effortlessly find products that meet their specific needs.
- Implemented key functionalities including a seamless user interface with secure login/logout, dynamic product detail pages, and advanced e-commerce features like add-to-cart.
- product filtering, and sorting to enhance user experience and streamline the shopping journey.
